

QUICK START GUIDE

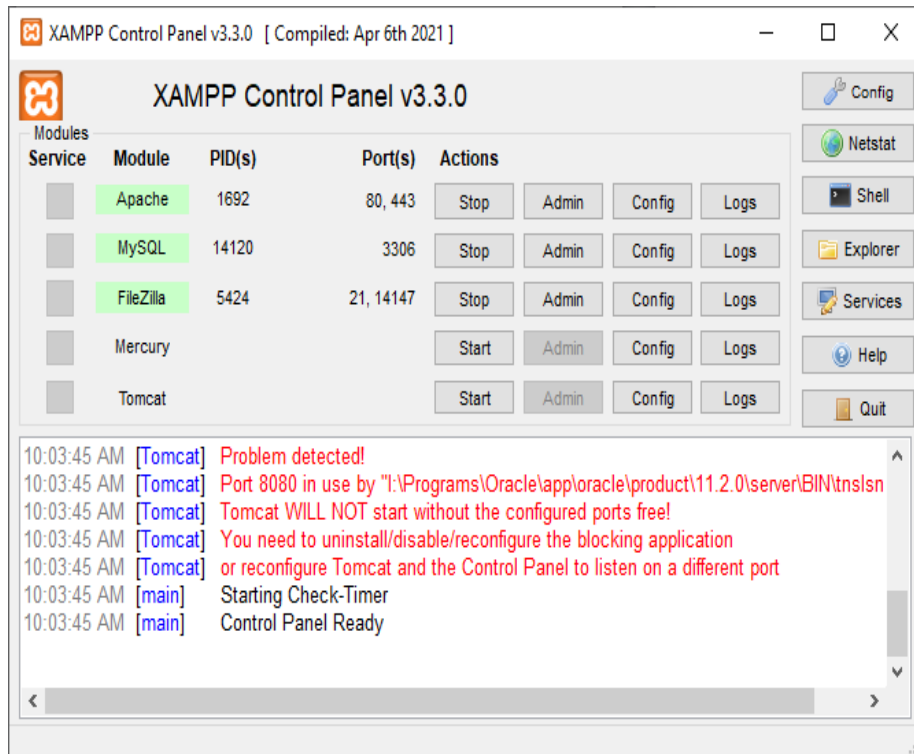

HOW TO SETUP THE STUDENT GRADES INVENTORY

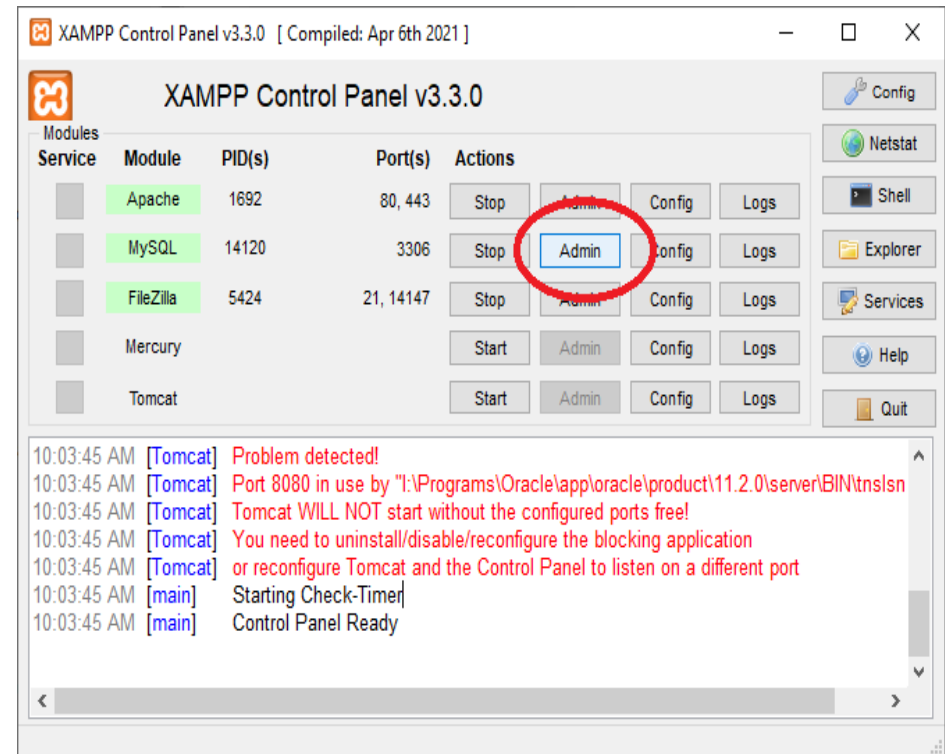

Needed software:

- ✓ **XAMPP Control Panel**
- ✓ **Google Chrome or any browser with JavaScript enabled**

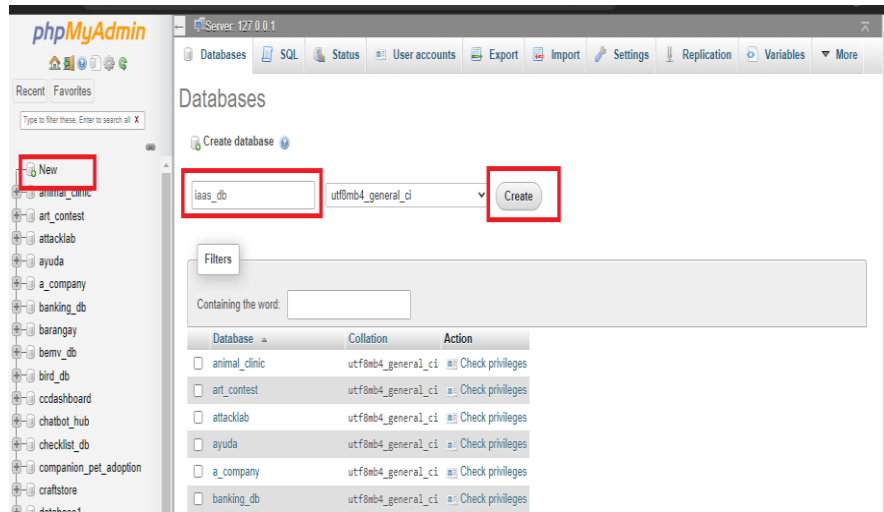

STEP 1: Start **XAMPP** and make sure that **Apache**, **MySQL**, and **FileZilla** are started.

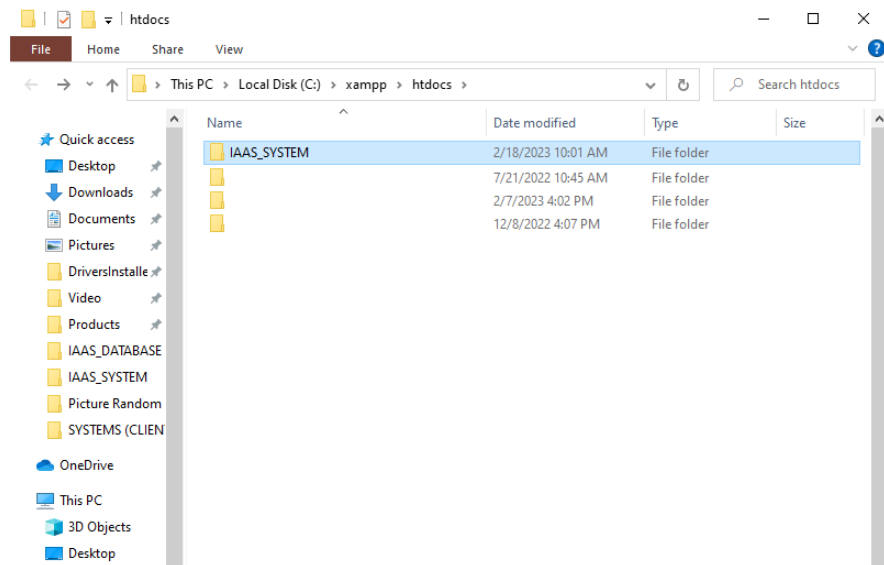

STEP 2: Click **ADMIN** on the **MySQL** row to open the **PHPMYADMIN** panel.

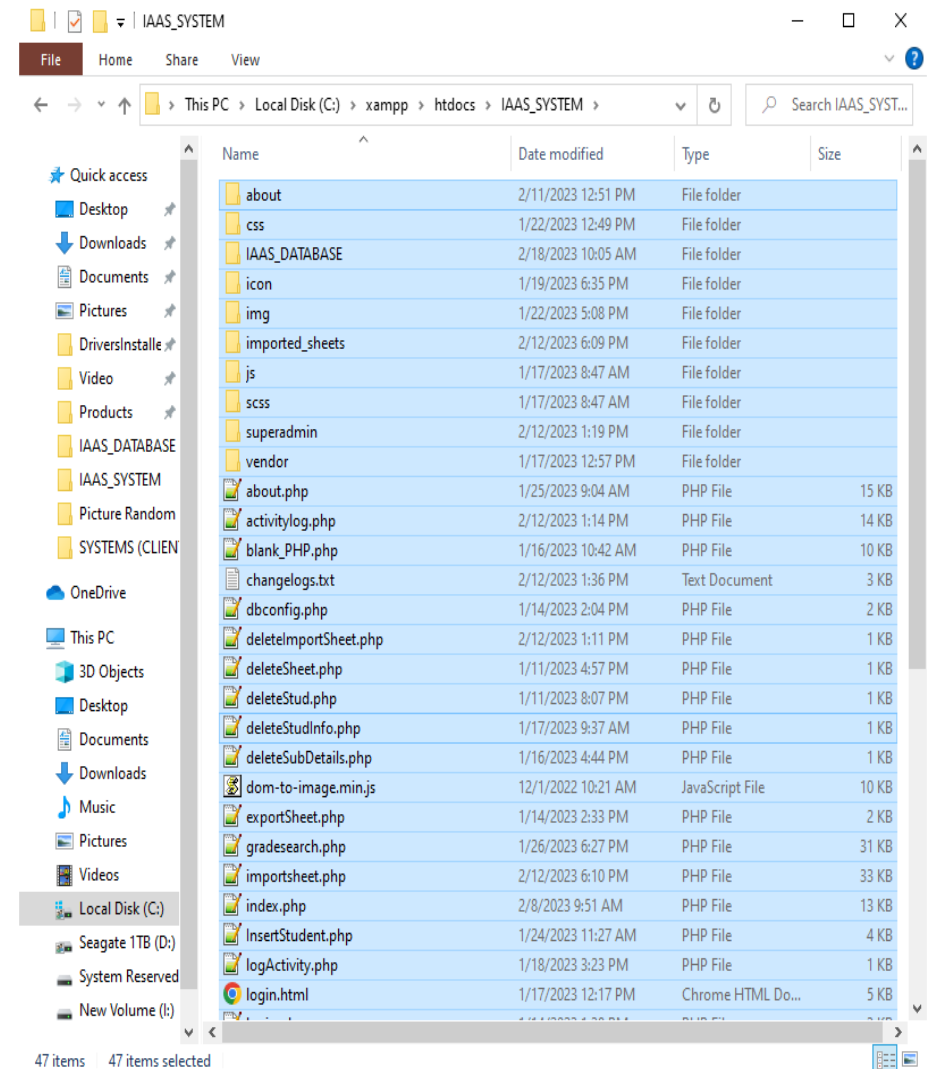

STEP 3: Click NEW on the left side, and then create a new database named “**iaas_db**” and click CREATE.

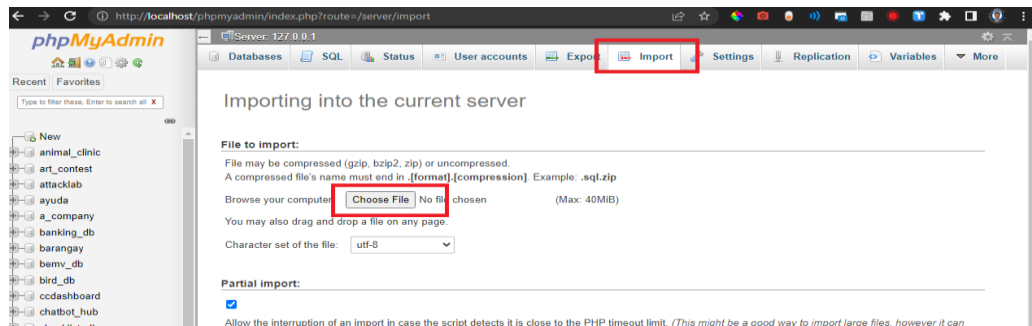

STEP 4: After creating, proceed to the “**C:\xampp\htdocs**” folder and create a folder named “**IAAS_SYSTEM**”.

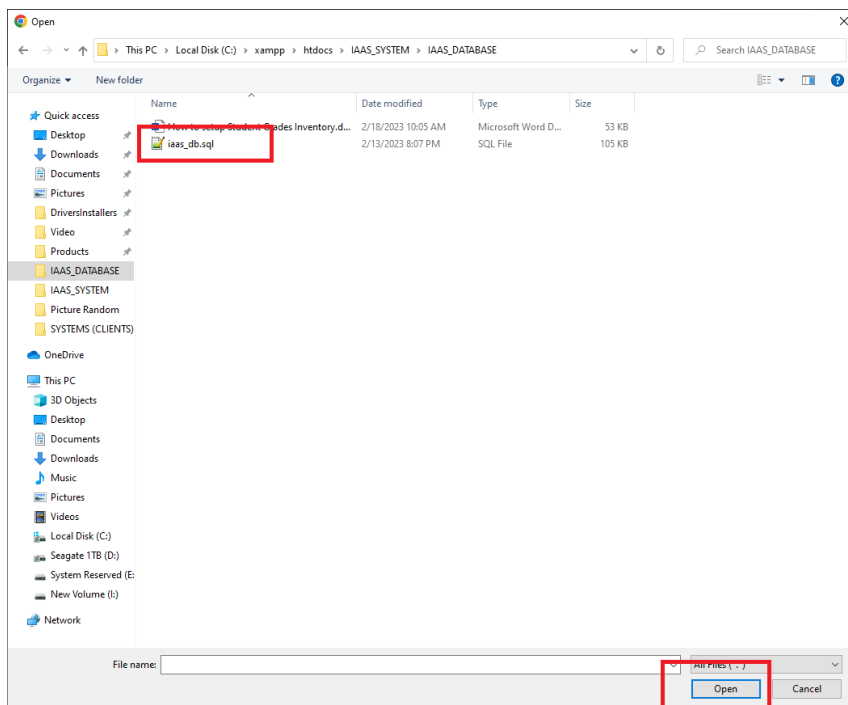

STEP 5: Go inside the **IAAS_SYSTEM** folder and paste all the resource files inside.

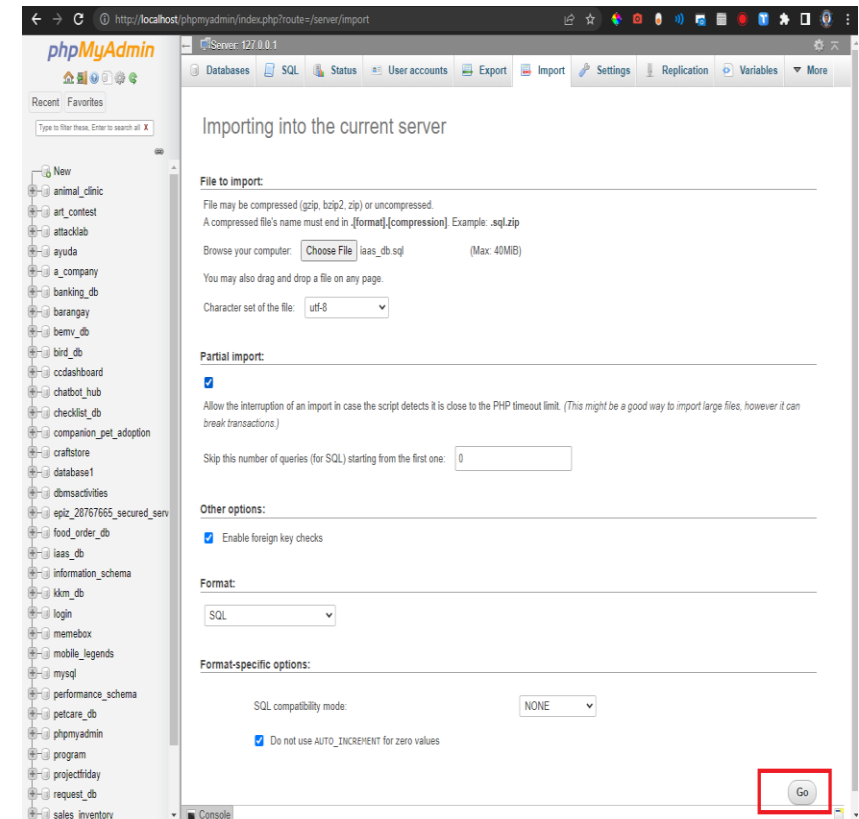

STEP 6: Once pasted, go back to the **PHPMYADMIN** panel and click **IMPORT** on the upper part, and then click **CHOOSE FILE** to select the SQL database.

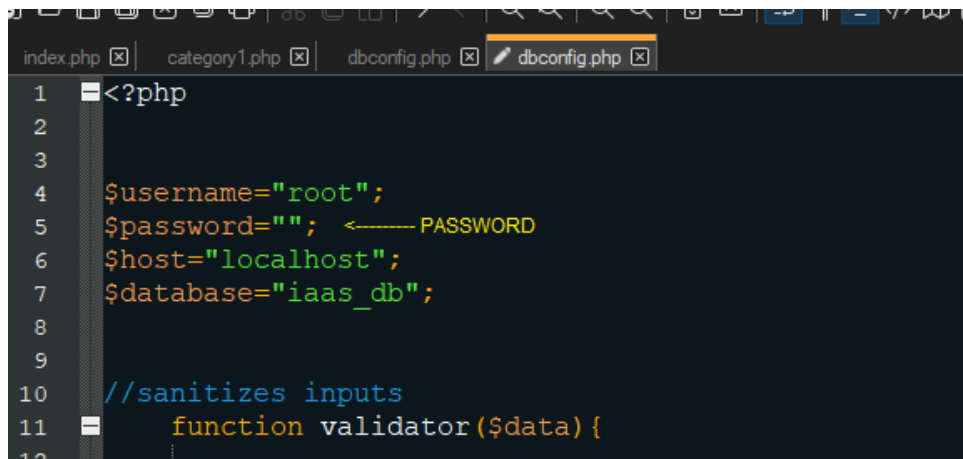

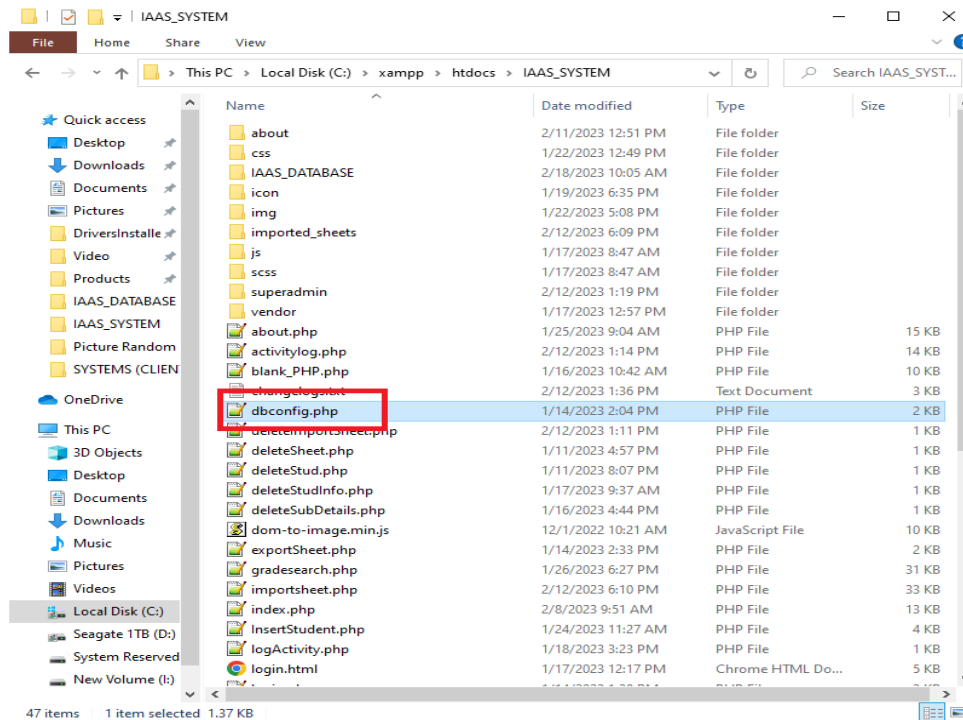

STEP 7: Go to the “C:\xampp\htdocs\IAAS_SYSTEM\IAAS_DATABASE” folder and select “iaas_db.sql” file then click **OPEN**.

STEP 8: Once selected, click **GO** and your database will now be set up completely.

STEP 9: Go back to the “C:\xampp\htdocs\IAAS_SYSTEM” folder, and find the “dbconfig.php” file, open it, and change the MYSQL details according to your MySQL credentials. If your MySQL server does not have a password, then leave it blank. Do the same on the “dbconfig.php” file inside the “superadmin” folder.

STEP 10: Now open Google chrome or any browser and head for the location of the system using this link http://localhost/IAAS_SYSTEM/superadmin/index.php then log in using the credentials below

USERNAME: joevy

PASSWORD: Joevy@123
